# Website Content & Asset Requirements

## 1. Brand Identity & Visual Assets

Please provide:

- **Logo Files:** High-resolution vector files (SVG, EPS, or AI) and transparent PNGs. We need variations for both light and dark backgrounds.
- **Brand Guidelines (if available):**
    - **Color Palette:** We recommend a mix of "clinical clean" (whites, light grays) and "vibrant nature/tech" (deep greens, aquatic blues, or earthy tones).
    - **Typography:** Preferred fonts (usually clean, modern sans-serif fonts that communicate professionalism and clarity).
- **Photography & Media:**
    - **Science in Action:** High-quality photos or videos of your lab environment, equipment, or team at work.
    - **Micro/Macro Shots:** Close-ups of the natural raw materials (e.g., plants, agriculture) and abstract molecular/cellular renderings.
    - **End-Product Applications:** Professional photos of the final products your ingredients go into (e.g., a perfect burger, a sleek cosmetic cream).

## 2. Website Architecture & Copywriting

Please provide text drafts or bullet points for the following core pages:

### Home Page (The Pitch)

- **Hero Headline:** A powerful, 1-2 sentence value proposition (e.g., "Engineering Better Ingredients for a Sustainable Future").
- **Mission Statement:** A brief summary of the problem you are solving (health, scaling, sustainability).
- **Key Highlights:** 3-4 bullet points of your flagship products or core capabilities.

### Technology / "How it Works" (The Science)

- **Process Breakdown:** Step-by-step text explaining your proprietary method (e.g., Natural Extraction → Fermentation → Formulation). We will turn this into a custom infographic or diagram.

- **The Advantage:** Why is your technology better? (e.g., 10x faster discovery, cleaner labels, superior scale).

### Solutions / Applications (The Offer)

- **Target Industries:** Which sectors are you selling to? (e.g., Food & Beverage, Personal Care, Agriculture).
- **Performance Benefits:** Data or claims on how your solution improves the end product (e.g., better taste, enhanced texture, greater bioavailability, longer shelf life).

### About Us / Our Story (The Authority)

- **The Journey:** Why was the company founded? What is the ultimate vision?
- **Team Bios:** Short professional biographies and headshots of the founders, lead scientists, and key executives to build B2B trust.

### Contact / Partner With Us (The Conversion)

- **Form Fields Needed:** What information do you need from leads? (e.g., Name, Company, Use Case, "Request a Sample" vs. "Investment Inquiry").
- **Contact Info:** Office/lab addresses, general email, and phone numbers.

## 3. Advanced & Creative Enhancements

To make the website stand out and feel highly innovative, please provide any of the following if you have them:

- **Data & Proof:** Any whitepapers, case studies, or clinical trial summaries we can offer as downloadable PDFs (great for lead generation).
- **SEO Keywords:** A list of technical keywords you want to rank for on Google (e.g., "clean-label emulsifiers," "precision fermentation startups," "plant-based protein R&D").
- **Interactive Concepts:** Let us know if you have data that could be visualized interactively (e.g., a sliding scale showing "Traditional R&D Timeline vs. Our Timeline" or a 3D rotating model of your core protein).
